Health Information Technology

Henninger High School P-TECH Pathway

The Career Field: Health information management (HIM) is the practice of acquiring, analyzing, and protecting digital and traditional medical information vital to providing quality patient care. It is a combination of business, science, and information technology.

HIM professionals are highly trained in the latest information management technology applications and understand the workflow in any healthcare provider organization from large hospital systems to the private physician practice. They ensure a patient's health information and records are complete, accurate, and protected.

The Program: Students enrolled in the Health Information Technology program will learn to use the most current information systems for collecting, analyzing, disseminating and maintaining health care and patient data. Students will learn to understand medical information through coursework in anatomy and physiology as well as medical terminology.
