

To: NYS P-TECH School Leaders

From: Robin Willner

Subject: Employer Recognition & Recruitment Events

Date: October 25, 2017

Now that the 2017-18 school year is underway, there are 431 companies and local businesses actively partnering with NYS P-TECH across the state. This is a 48% increase over the previous year and is limited to those partners who are currently participating. Congratulations to everyone who has worked so hard to develop these robust collaborations and to ensure that all of our students are exploring career opportunities, mastering professional skills, and addressing workplace challenges. This only happens with leadership at the school and district level, persistence from work-based learning coordinators and guidance counselors, enthusiasm from employer partners, and amazing accomplishments from our students.

In 2017, we conducted 5 regional employer recognition and recruitment events across the state. These were very effective opportunities to celebrate current partners, engage with business organizations and associations, and identify and recruit potential employer partners. This model can be easily adapted by any individual P-TECH program or group of schools as you continue to grow your work-based learning activities. Many NYS P-TECH schools already have similar events underway and we hope the materials and guidance attached will help you to refine your activities. For those schools that have not yet ventured into this arena, we hope these resources will help you get started.

The recommendations below outline the most effective practices we developed over the course of the first 5 events. Attached are a number of sample documents (invite email, agenda, signup sheets, certificates, etc.) for you to adapt and improve. Please let me know if you host a similar event and keep me updated on the results. And please direct any and all questions, ideas, etc., to me. Let's get started.

GOAL

- To celebrate and honor current employer partners
- To raise the visibility of P-TECH in the local business community
- To identify and recruit new employer partners

SUCCESS FACTORS: PLANNING

Consider whether this is best-designed as an event focusing on a single school/program or
whether it will be more effective to create an event for a larger cachement area, including two
or more schools, particularly if they offer different career pathways.

- Identify at least one co-host in the business community. This may be a current partner, particularly if a local chamber of commerce or trade association is already engaged with P-TECH. Factors to consider for a co-host include:
 - Visibility and credibility in the local business community
 - Access to membership and/or a broad distribution list
 - o Experience convening and executing similar events
 - Access to online registration functionality
 - o Contacts with media and elected officials
 - Calendar of events for local businesses
- Consider other local events that may offer an opportunity to "piggy back" rather than starting from scratch.
- Confirm a date that does not compete with other events and a location, preferably one that is well-known and has convenient access and parking.

SUCCESS FACTORS: PREPARATION

- Create and distribute invitations (see sample provided) to the largest possible list. If possible, have the invitation come from an individual's email address to avoid spam filters. Regardless, make sure the sender or subject line reference a well-known individual. Include a "Click here to Register" icon upfront and again at the end of the email to allow participants to click through to register on line. Send initial invitation 7 weeks in advance and then send reminders one month and 2 weeks prior to the event. Also, send confirmation emails at time of registration and then 5 days before event and 1 day before event.
- Send a personal invitation to all current partners and let them know they will be recognized at the event.
- Reach out to local elected officials to participate and offer a speaking role.
- Confirm speakers (see sample agenda attached), including welcome from co-sponsors, any local
 elected officials, students from each participating school, and someone to provide NYS P-TECH
 overview (see sample presentation to localize).
- Determine the selection process for students (see sample questions attached), prepare them in advance and confirm permission slips, transportation, etc.
- Identify names of companies or individuals for special recognition at the event, e.g. lead partner, companies with the highest number of career mentors/volunteers, companies that helped design a workplace challenge, etc.
- Identify 3-4 current employers to participate in panel (see attached questions) and collect biographies.
- Identify an MC to move the agenda along.
- Finalize handouts, including:
 - o I'm Ready to be a Partner, Sign-up sheet (see attached),
 - Overview of NYS P-TECH (see attached),

- Marketing materials for your school
- Work-Based Learning Toolkit (https://www.dropbox.com/home/NYS%20P-TECH%20EMPLOYER%20GUIDE) and
- Certificates (see sample attached).
- Confirm food order, room layout, dais, A/V equipment, etc.
- Develop communications/media plan.
- Identify someone to take photo's at the event.
- Confirm staffing for registration table, logistics, etc.
- Prepare sign-in sheet, name tags, etc.
- Announce the event at all sponsor activities the previous month.
- Send final registration confirmations.
- Confirm cell phone numbers/contact information for all speakers and key staff.

SUCCESS FACTORS: DAY OF THE EVENT

- Arrive early to confirm room setup, food delivery, signage, etc.
- Identify one person to greet and seat speakers and local VIPs when they register.
- Prepare a table for students and make sure they have breakfast before the proceedings begin.
- Give everyone a 5 minute warning to finish networking and be seated.
- Start promptly.
- Make sure everyone completes the sign-up sheet and collect them.
- Thank all venue staff before leaving.

SUCCESS FACTORS: FOLLOW-UP

- Send thank you emails to all speakers and sponsors.
- Reach out to all current partners to confirm their ongoing engagement.
- Confirm who will contact each employer who submitted a sign-up sheet.
- Debrief with sponsors and planning team for future events.
- Post photo's to social media, create a blog post or article for school and sponsor web sites and newsletters.

And finally, begin to plan the next work-based learning activity!

SAMPLE INVITATION

GROW YOUR FUTURE WORKFORCE

Note: If possible, have the invitation come from an individual's email address to avoid spam filters. Regardless, make sure the sender or subject line reference a well-known individual. Include a "Click here to Register" icon upfront and again at the end of the email. Send initial invitation 7 weeks in advance and then send reminders one month and 2 weeks prior to the event. Allow participants to click through to register on line and send confirmation at time of registration and then 5 days before event and 1 day before event.

To Local Employers:

Are you struggling to recruit the skilled employees you need to sustain and grow your business? Do you find that math, science, and professional skills of candidates don't meet the standards your business requires? Is the local talent pipeline prepared to drive economic development? It's time to <u>Grow Your Future Workforce</u>. Learn how employers in our community are connecting with high schools and community colleges to prepare a robust talent pipeline to fuel economic growth.

Date:
Time:
Location:
Cost: Complimentary

Event Details:

Space is Limited – Please Register Today!

Local business leaders, educators, and students from the area's P-TECH programs will share their experiences. Learn more about the high-functioning school/business partnerships which characterize the P-TECH 9-14 model being adopted across New York. Attendees will receive materials created and tailored to address employer needs and have the opportunity to launch new partnerships on the spot.

Don't miss this special opportunity to learn about this transformative education model designed to ensure area students are ready for real business challenges.

Sincerely,

GROWING BUSINESS WITH LOCAL TALENT

A NYS P-TECH Local Employer Forum

LOCATION

DATE

GROW YOUR FUTURE WORKFORCE

EMPLOYER RECRUITMENT & RECOGNITION EVENT

Questions for Student Panel

- Why did you want to attend this program?
- How is your current high school different from your middle school? Is it different from the high schools your friends attend?
- Tell me about a work-based learning experience that you enjoyed? (e.g., a work site tour, workplace challenge, mentoring activity, etc.
- If students have already earned college credits, How was your college course different from your regular high school classes?
- What's the best thing about your high school?
- Would you encourage other students to apply? Do we need more programs like this?
- What are your plans after you complete your high school diploma and AAS degree?

Questions for Employer Panel

- Can you share a brief (1 minute) profile of your company how long have you been operating in this region of New York, how many employees, how many vacancies/new hires each year, etc.?
- What initially attracted you to the NYS P-TECH 9-14 partnership?
- Do you have a skills gap to fill? Do you currently have difficulty finding prospective employees for entry level positions?
- What skills are most difficult to fulfill? Do they tend to me technical skills or the professional skills we've discussed?
- Can you describe a recent partnership activity, e.g. skills mapping, career mentoring, work site tour, classroom visits, workplace challenge?
- What distinguishes NYS P-TECH from other partnerships you have had with schools or job training programs?
- What benefits do you expect in return for your investment and the time of your employees?

THANK YOU!!

New York State P-TECH

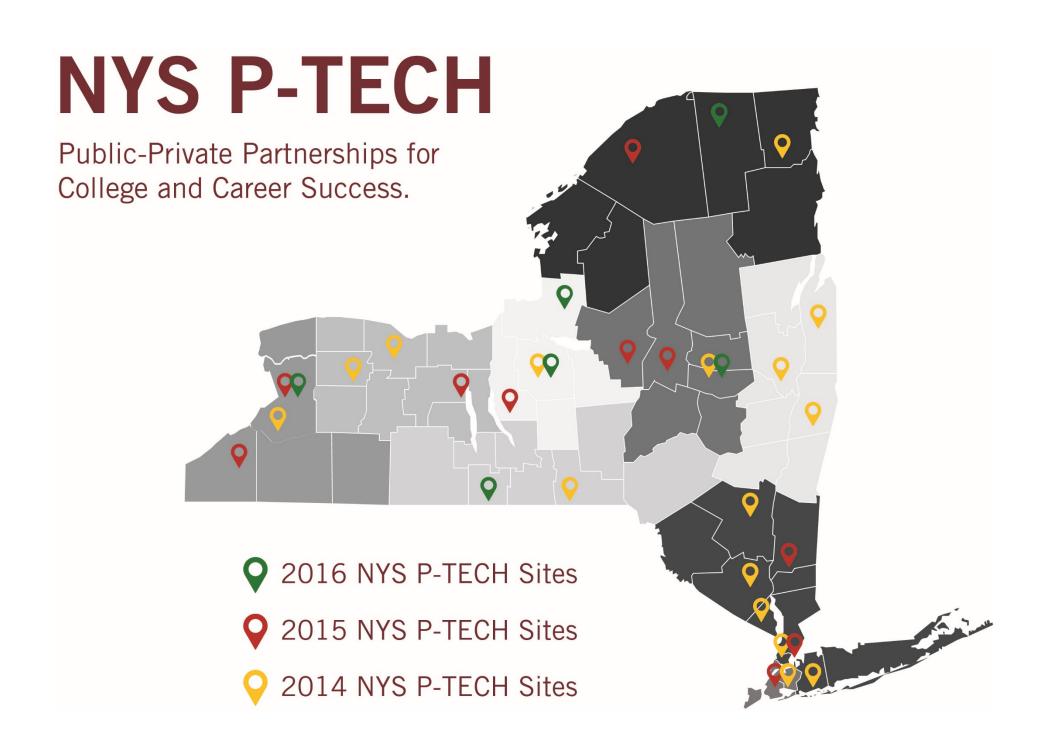

New York State P-TECH is a public-private partnership that is recruiting 2000 9th graders each year to an innovative six year program that will prepare them for high-skills jobs of the future in technology, manufacturing, healthcare and engineering. Announced in February 2013 by Governor Andrew M. Cuomo, \$98 million in new state funding is now being provided through the New York State Education Department over 10 years for a total of 39 new partnerships, including 16 schools that opened in September 2014, 10 schools that opened in September 2015, a third cohort of 6 partnerships opened in September 2016, and 7 new schools being planned for September 2018.

NYS P-TECH is both an education and economic development initiative. The model, based on the successful partnership among the NYC Department of Education, City University of NY and IBM to design and operate the first P-TECH school in Brooklyn, NY, prepares under-served students to be the highly skilled, critical thinkers and problem-solvers that our 21st century workforce requires. Each of the innovative schools – serving all of the state's 10 economic development regions — brings together three essential partners: K-12 education, higher education and industry. The model offers an integrated six-year program, combining high school, college and career training. Focusing on disadvantaged students, each student will have the opportunity to graduate with an Associates level degree at no cost to the student's family and will be first in line for a job with participating businesses. The school design, drawn from research-based effective practices, offers a rigorous academic curriculum, targeted technical training, comprehensive workplace learning and individualized support services and pathways.

Through local partnerships, business and industry representatives work with education professionals to create a six-year scope & sequence that meets the requirements for entry into specific middle jobs. Skills mapping, a unique approach to curriculum design, assures that the program delivers 21st century talent needs. This career focus is infused into every academic and technical course, providing relevant opportunities for students to hone skills, create projects and address complex problems through multiple pathways. Project-based learning in authentic situations is an essential instructional approach.

The bedrock of NYS P-TECH is the partnership among the three sectors. Delivering on the promise of the NYS P-TECH model requires specific commitments from all participants. School districts and colleges must develop and implement a seamless six- year curriculum of rigorous academic and technical study with individual pathways for students of every academic level. Employers are responsible for identifying mentors, developing substantive workplace and classroom activities and internships along with future job opportunities. This requires innovative staffing, scheduling and instruction and new relationships among faculty, school leaders and employers.

With guidance and policy oversight from the NYS P-NYS P-TECH Leadership Council and the professional development and support provided through the private sector's Public Policy Institute of NYS, Inc., these new partnerships are thriving. They offer an innovative approach to school design and community engagement that will prepare students with the secondary AND post-secondary credentials and experience necessary for 21st century careers and offer a qualified talent pipeline for local employers.

DESIGN PRINCIPLES

- 1. Middle Jobs are the Sweet Spot
- 2. Motivation = Real Jobs
- 3. Career-Infused PBL Drives Mastery
- 4. College Credits = New Aspirations and Skills
- 5. Cost-Free Degree Changes the Odds
- 6. Time is Priceless
- 7. Partnership Drives Impact
